

Side of Toilet Rail, also known as PT rail

A unique offset support rail for use on one or both sides of a toilet. Hinged or fixed model. Wall or floor mount depending on installation requirements. Assistance for getting on and off the toilet. Available in left or right hand configurations.

Features and Benefits

Prevent Wrist Strain.

Unlike vertically aligned dual rails, the P.T.Rail™ features an offset rail design. This allows for improved use of the lower rail and helps to prevent wrist strain when reaching for the lower rail.

Convenient And Safe.

The hinged P.T.Rail™ easily folds up to store out of the way and will not accidentally fall down causing an impact injury.

Unmatched Sturdiness.

Unlike other fold down rails that wobble, the P.T.Rail's™ machined, precision, tension fit hinge creates stable, rock solid support. A proven rail designed to suit home or institutional use.

Toilet Roll Holder (sold separately).

Add to any P.T.Rail™ to eliminate the need for unnecessary reaching and twisting.

Technical Specifications:

Rail Lengths	28" and 32" / 71 cm and 81 cm options from wall to tip of rail.
Rail Diameter	1.5" / 3.81 cm diameter (ADA Compliant).
Rail Offset	6" / 15 cm vertical offset. 1.5" / 3.8 cm horizontal offset.
Wall Plate	5.5" x 9" / 15 x 23 cm with 3/8" diameter fastener holes.
Material / Finishes	Steel (white powder coat or chrome plated) or stainless steel.
Weight Capacity	400 lbs / 181 kg.
